Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application.

Listing of Claims:

1. (Previously Presented) A mass spectrometry ionization method comprising:

delivering electrospray droplets from an electrospray nozzle of an electrospray ionization mass spectrometer, wherein the electrospray droplets contain solvent and analytes; and exposing the electrospray droplets to a proton beam thereby increasing the unbalanced charge of the electrospray droplets, wherein the proton beam energy is from 5 to 10 eV.

- 2. 8. (Cancelled)
- 9. (Presently Amended) The method of claim 1, wherein the sample is droplets are injected into quadrapoles quadropoles of the electrospray ionization mass spectrometer.
- 10. (Previously Presented) The method of claim 1, wherein the analyte comprises organic compounds having nitrogen, oxygen, or sulfur heteroatoms.
- 11. (Previously Presented) The method of claim 1 wherein the proton beam flux is from 1 mA/cm² to 17 mA/cm².
 - 12. 13. (Cancelled)
- 14. (Previously Presented) The method of claim 1, wherein the electrospray flow rate is from 0.025 μ L/min to 0.5 μ L/min.
 - 15. 19. (Cancelled)
